About Workshop

Gender Awareness is an understanding that there are socially determined differences between women and men based on learned behavior, which affects access to and control over resources. This awareness needs to be applied through gender analysis into projects, programs and policies.

Gender is a complex variable in social, cultural, religious, economic and political contexts and is different in across time, space and communities. The question of gender needs theoretical clarity. Gender is not a rigid or reified analytic category imposed on human experience, but a fluid one whose meaning emerges in specific social contexts as it is created and recreated through human actions. Through the workshop the basic concepts of Gender, recent development in gender studies and their implications for the practice of social sciences in India will be discussed. The issues related to all forms of violence against women in all spheres of life will also be addressed through this deliberation. The different methodological and theoretical approaches to gender and its relevance to interdisciplinary subjects will also be highlighted.
